

Passkey Support Engineer Job Description

No H1B visas nor recruiter submissions, please.

Support Engineer position is for a hands-on J2EE Engineers with good problem-solving skills, passion for the job along with good communication skills.

Technical Skills

The ideal candidate will have experience in most of the following-

Java, Oracle, J2EE, EJB, Struts, AJAX, XML, Web Services, JSP, Portal, JDBC, Servlets, UML, Design Patterns, JBOSS/Tomcat/Weblogic/Websphere, EAI Projects, open-source frameworks, Eclipse, ANT.

This is not a plain Java, JSP, Servlet position. The candidate must have experience working with core J2EE technologies as well as established design patterns.

Qualifications

Passkey has various positions available and is accepting candidates at many levels of experience, but the minimum is: 3+ yrs experience in software(Java) development with 1 yrs of hands-on experience in building n-tier Java distributed apps on a j2ee platform.

Hands on experience in some of the following would be strongly preferred-

- Experience with J2EE server-side applications.
- Hands-on experience implementing at least one commercial-grade Web Service
- Experience developing systems with XML, XSLT, XML Schema
- Good understanding of Oracle concepts and strong SQL & Stored Proc skills
- Solid understanding of web application MVC architecture (struts or similar)
- Master's or Bachelor's degree in Computer Science or Engineering

Qualities being sought are

- Self-driven, and willing to work in an energetic, fast paced and team-oriented development environment
- Excellent communication skills, including the ability to work effectively with clients and vendors, and within a team environment
- Independent, innovative, cost-conscious problem-solver.
- Willingness to take on responsibility and accountability
- Curiosity & desire to learn new technologies
