

EventExpress™

Personalized Group & Event Reservation Websites in Minutes

What is Passkey's EventExpress™?

Online Group Reservations Made Easy

EventExpress™ lets you build customized group reservation websites in minutes. It's ideal for all types of groups and events, from wedding to corporate meetings to sports events. Simply enter your event information, dates, rooms and rates into an intuitive, one-page form, and additional details pre-populate from defaults in your hotel profile. Once done, planners are notified via email, so reservations can be made online, easily and securely.

Customized Events

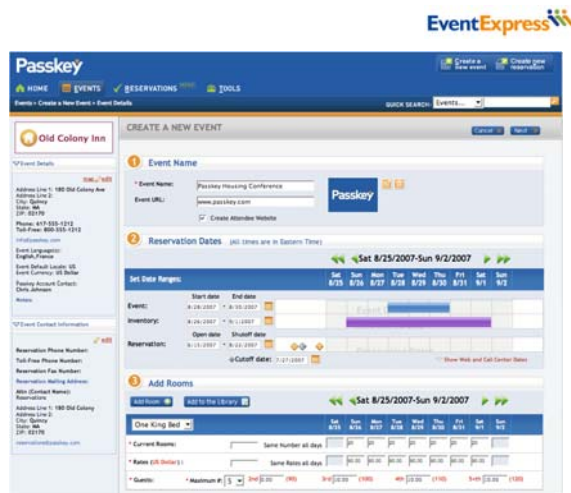

Designed for single-property events, EventExpress automatically copies default event data from your hotel profile, including website graphics, room type information, templates and SmartAlerts™, so you can create events quickly and easily.

Instant Inventory Allocation

With EventExpress, all you have to do is select rooms from your room type library and enter event contract information (rooms & rates), with no need to assign rooms to sub-blocks.

Express Room Lists

Create an event and immediately upload room lists, or let planners upload their room lists via Passkey's RoomList Express™. Completed reservations are transferred into your PMS or CRS in just minutes.

Create online events in 3 minutes or less.

How do I Benefit?

A Reservation Website for Every Event

Passkey's EventExpress accelerates event creation by consolidating all data entry onto an intuitive one-page online form, where it takes only a few clicks to create an event. Other information is automatically copied from your hotel profile.

Communicate Directly with Planners

Create online events in three minutes or less, then send the planner a customized email announcing the new event. Event-specific information, including links to the Attendee Website and the RoomList Express secure drop off location bridges the communication gap between hotels and planners.
